

VISTA MARIA

TREATMENT FOSTER CARE

Our Treatment Foster Care Program is designed to meet the unique needs of youth who are experiencing concerns with mental health, escalated behaviors, medical conditions and severe trauma. Youth in this program receive increased services based on their individual needs such as therapy, psychiatry, individualized education plans and more. However, services are not all these youth need. They are also in need of the care and compassion of loving families to help them heal and grow.

The individual needs in the Treatment Foster Care Program vary, but one thing remains the same; they are just youth. Typically, youth in this program range in age from 8-17. Just like any other youth, they need the structure and guidance of caring adults to help them meet their developmental milestones, consistently meet their mental health and medical needs, ultimately leading them to a life beyond trauma.

Vista Maria welcomes individuals from various backgrounds and skill levels to become Treatment Foster Care Parents. However, experience has shown that successful Treatment Foster Care Parents share a wealth of common attributes such as:

Professionalism

Patience

Compassion

Flexibility

Dedication

Being a team player

Being willing and able to advocate

Having reliable transportation

All youth in foster care are capable of living inspiring, successful, fulfilling lives. They are strong and courageous, but also vulnerable and in need of healing. They need people just like you to help them ignite the spark; to light the way to a life of possibility. Become a Treatment Foster Care Parent.
